

## **SOFTWARE QA ANALYST**

### **Let's start with why.**

This is how we work at Profound Impact. Start with why, focus on things that matter. Get stuff done while taking ownership of success and maintaining a high level of creativity and technical expertise.

Our purpose to create a profound impact extends into society as we engage our team with learning opportunities, social impact practices, and professional development to fuel collaborative innovation and trust. We work as one in a flexible work environment that gives you the autonomy to work at your best. We support our team with programs to match donations, provide volunteer time off, develop new skills, and commit to sustainability. Your values contribute to Profound Impact's direction creating inclusivity and belonging in all that we do.

Help us connect great people to do great things at Profound Impact!

**Job Location:** Waterloo/Guelph/Oakville/Mississauga/Toronto regions, Ontario, CA.

### **Role Description:**

Profound Impact is looking for a passionate Software QA Analyst to join our growing development team. Our product is a balanced combination of AWS Serverless architecture with Graph technologies. The ideal candidate is a fast learner with familiarity with both black/white box testing and also unit tests, stress testing or other testing methods. He or she is someone who is always looking to break things!. You'll work closely with the Technical Program Manager and other developers in an Agile environment to complete bi-weekly sprint tasks.

# PrfoundImpact

## **Responsibilities:**

- Design and implement testing plans for new code and enhancements to existing code
- Develop manual & automated test cases
- Develop processes for scalable testing models and methods
- Integration testing
- Manage development tickets in the defect tracking system (JIRA)
- Communicate quantitative and qualitative findings from test results to the development team
- Spot areas for improvement to enhance the platform's efficiency

## **Desired Skills and Competencies:**

- Bachelor or studying in Computer Science, Mathematics or Engineering is preferred
- Keen attention to detail
- Strong analytical and problem-solving skills
- Excellent verbal and written communication skills
- Creative and innovative thinker
- Diligent and meticulous
- Familiarity or willingness to learn Version control and Agile Methodology with bi-weekly sprint delivery.

## **About Profound Impact:**

Profound Impact is a woman owned Canadian company. We have developed a next-generation social engagement and interaction platform for use by universities and their alumni and faculty members to discover, measure and demonstrate the impact that the institution and its community have had and continues to have on the world. This transformational digital community differentiates itself in that it is specifically designed for a well-defined user base and offers a rich set of visualization and relationship exploration tools.
